## ADAPTATION OF THE EVALUATION METHODS

Método de Evaluación	Herramienta de Moodle	Porcentaje
Exams	Videoconference exam	30
Case study/clinical case discussion/scientific work discussion	Delivering seminar	30
Diaries	Delivering homework	20
Practice reports	Delivering reports	20
<b>Total (100%)</b>		<b>100 %</b>

### Explanations on the evaluation method:

1.- Following the agreement of the UCO Government Council, in order for you not to lose abilities and theoretical and practical contents, I have modified the weight of the evaluation methodologies and the methodological tools as well.

Evaluation methods %

Exams 30

Seminar 30

Homework 20

Practice reports 20

2.- Practice reports.

With the exception of the GeneBank practice (already delivered) and the Montecarlo simulation of genetic drift (carried out in the regular classroom), the left practice reports will be uploaded at Moodle. Dead line: on May de 25th (but you can always upload before).

## ADENDA A LA GUÍA DOCENTE

### 3.- Seminars.

They are now mandatory. Everybody has already chosen one.

A 10 pages maximum word abstract and a ppt presentation will be uploaded.

Presentation should be prepared for a 10-15 minutes speech and should include in the notes parts every word you are going to spell.

Seminars will not be presented.

If there is anybody that has already delivered the seminar and likes to upload a new version, please tell me.

Dead line: First of May (but it is possible to upload it before)

4.- Homeworks remain as before. We will be plenty of time for reviewing them several times.

### 5.- Exam.

The exam will be on May the 18th by Moodle using the video Blackboard tool. It will be the same type as the Exam proposal in the Moodle. Time will be limited. Cheat sheet can be used.

It will consist of two parts: A) true/false; B) problems

The Tareas tool of Moodle will be used to upload your hand-written exam.

The threshold for passing the course is 5/10 with no minimum partial requirement at any evaluation method.

### GRADE OF NOT PRESENTED.

The grade of "Not presented" will correspond to the student who has not taken part in a number of evaluable activities whose weights on the final grade amount to more than 50% (Art. 80.4 of the Regulations for the Academic Regime of Degree Studies).

For the student who has participated in assessment activities other than the final exam whose accumulated weight on the final grade exceeds 50% and has not attended the final exam of the subject, the teacher will record "Not presented" in the provisional publication of the ratings.

If during the review process, the student does not express his disagreement with that grade, it will be consolidated into the final grade for the course. Otherwise, you must notify the teacher and the final grade would be the weighted sum of the scores achieved in all the assessment methods to which you have attended according to the criteria established in this addendum.
